Many of species of butterfly were seen but most of them unidentified. There is a new book due out with photos covering the country's species so next trip we will be able to put some names to some of these fabulous insects.

Please note that our checklists do not include species seen by leaders only.

We also do not include single observer sightings or very poor views.

We do not count heard only or subspecies, although they are noted.

This we believe gives us a very honest accurate group total.

With this in mind we welcome you to compare our lists with other companies, check out our high standards and above all our prices which offer the very best value for money.
